Summary

Frontend Developer with 1+ years of professional experience building production-ready React.js applications in the fintech and e-commerce domains. Experienced in developing reusable UI components, integrating REST APIs, managing application state using Redux and Context API, and translating Figma designs into responsive, accessible interfaces. Proficient in JavaScript (ES6+), TypeScript, Git, Vite/Webpack, and CI/CD workflows with a strong focus on performance, scalability, and user experience.

Core Competencies

React.js Development • JavaScript (ES6+) • TypeScript • REST API Integration • Redux • Context API • Responsive UI • Accessibility • Component-Based Architecture • Performance Optimization • Figma-to-Code • Git • CI/CD • Frontend Performance

Skills

- **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3
- **Frontend:** React.js, Next.js, Angular, Ionic, Capacitor, Tailwind CSS
- **React Ecosystem:** React Hooks, Redux, Context API, React Router, Custom Hooks
- **Web Development:** REST APIs, AJAX, Responsive Design, Accessibility (WCAG), Cross-browser Compatibility
- **Tools:** Git, GitHub, Vite, Webpack, Postman, Chrome DevTools, Vercel, Figma, CI/CD
- **Architecture:** Component-Based Architecture, Lazy Loading, Code Splitting, Rendering Optimization, SSR, SSG

Experience

PrediQt - A RezolveAI Company – Kolkata

Aug 2026 – Present

Junior Frontend Developer

StockEdge Fintech Pvt. Ltd. – Kolkata

Oct 2025 – Aug 2026

Management Trainee – Frontend Engineering

- Developed reusable React components and frontend features for a production fintech platform, improving maintainability across investment dashboards and analytics modules.
- Translated Figma designs into responsive, accessible production interfaces while maintaining pixel-perfect implementation across desktop and mobile devices.
- Led the Capacitor v7 → v8 migration, resolving compatibility issues and stabilizing hybrid Android and iOS application builds.
- Integrated REST APIs and collaborated with cross-functional teams to deliver scalable, data-driven financial dashboards.
- Diagnosed and resolved critical frontend issues using Chrome DevTools, improving production stability and reducing release blockers.
- Participated in Git-based code reviews and CI/CD workflows to maintain high code quality and reliable production deployments.
- Improved frontend accessibility by implementing WCAG-compliant components, enhancing keyboard navigation, semantic HTML, focus management, and screen-reader support, helping create a more inclusive experience for users, including people with disabilities.

Farmershop Tech India Pvt. Ltd. – Remote

Mar 2025 – Apr 2025

Frontend Developer Intern

- Built React-based admin and store dashboards integrating REST APIs and Context API for multi-user e-commerce operations.
- Reduced form submission errors by **50%** through real-time validation and optimized API-driven CRUD workflows.
- Integrated Google Maps API with drag-and-drop geolocation functionality for delivery zone management.
- Collaborated with backend developers to implement scalable frontend modules while improving usability and overall user experience.

Open Source Contributions

DoxDock – Open Source Contributor

Jul – Aug 2026

React.js, JavaScript, Canvas API, ONNX Runtime Web, WebAssembly — GitHub Repository — Live Application

- Developed and shipped an **AI-powered background removal tool** using **U²NetP**, **ONNX Runtime Web**, and **WebAssembly**, performing image segmentation entirely in the browser without uploading user data to external servers.
- Implemented **local ONNX model loading**, **inference-session caching**, **image preprocessing**, **mask generation**, and **alpha-channel composition**, preserving source image resolution while improving repeated-inference performance.

- Engineered an **offline-first image processing pipeline** by bundling the AI model and WASM runtime locally, eliminating external API/CDN dependencies and enabling background removal without network requests.
- Developed and merged an **Image Color Inversion** tool using React.js, JavaScript, and Canvas API, providing client-side image processing with support for PNG and JPEG formats.
- Built a reusable **global drag-and-drop event system** that routes files dropped anywhere in the application to the active tool, with visual feedback, duplicate-event prevention, and lifecycle-safe cleanup.
- Established project-wide **ESLint and Prettier tooling** with React, Hooks, and Refresh rules, automated lint/format scripts, and contributor documentation, improving code consistency and maintainability.
- Collaborated with project maintainers through **GitHub issues, pull requests, code reviews, testing, and documentation**, with multiple contributions merged into the production codebase.

Achievements

- Secured **2nd Place** among 30+ teams in an Inter College Web Development Competition.
- Core Team Member of **Megatronix Technical Club**; led frontend development initiatives and helped organize the Paridhi technical event attended by **700+ participants**, featured by Edugraph and Times of India.

Education

B.Tech in Computer Science and Engineering
Meghnad Saha Institute of Technology, Kolkata

2022 – 2026
